

10. January 2020

Declaration of conformity *Nr. 2020-01*

Spacer "UNI (wheel spacer)" list are used to create a protective layer of concrete structures. Universal wheel-spacer for the perpendicularly reinforcement steel for various diameters. Fixed firmly armature diameter 4-20 mm.

To do this, two spacers are fixed to a smooth round steel rod at a distance of about 10cm.

Material: Polyolefin

Stability / storage-conditions: Long termed intensive influence of light (UV-Radiation) can damage products of PE Polythene. During the Storage the articles should be protected against sun exposure and bright daylight.

Designation	For steel diameter	Concrete-cover
UNI 15	4-10mm	15mm
UNI 20	4-12mm	20mm
UNI 25	4-12mm	25mm
UNI 30	4-12mm	30mm
UNI 35	4-12mm	35mm
UNI 40	5-14mm	40mm
UNI 50	8-14mm	50mm
UNI 6-20/30	6-20mm	30mm
UNI 6-20/40	6-20mm	40mm
UNI 6-20/50	6-20mm	50mm
